
CB login module with eclipse template

Posted by Lars - 2008/06/02 07:23

I am using the CB login module with the eclipse template. Unfortunately the boxes are the same color as the background, making them a bit hard to spot.

How can I do some minor changes? I am assuming that the login module that's available with the template, is of no use with CB. Am I correct?

Hello Lars,
You can use CB. but for login module, you need to hack CB login or hack registration url from eclipse module login.

Regards

Hi
So what would be safest/easiest?
I just had a look at the eclipse module, but I didn't find any registration url.

Can you give me a few hints on how to do it step by step, whatever is the easiest? :-)

Hello Lars,
Please edit your eclipse login module (mod_login4eclipse.php) from line 94

change become to

Good Luck

Thats strange, there is no link for signing up, only the "lost password". Isnt it supposed to be there?

Have you enabled allow user registration at Global Configuration of your Joomla site? Make sure you have been do that so the link for signing up will be shown.

regards,

dennysp

Hi dennysp

Its the modulke somehow, there is no problem signing up, using the CB module.

I will reinstall the template just in case. I was looking around for some color codes, so just in case I messed something up.

To be continued :-)

Problem solved, registration in global setting was off, because of the option being on in CB.

Thanks for helping guys :-)

By the way, having bought a customized version of the template, would it be ok for me to remove the "Design by: camp26.com" in the footer?

Also, why dont you fix this bug with the quick reply on every post? Its confusing to the eye. I had the problem, and a few lines of code fixed it

We are sorry Lars,
you haven't permission to remove the "Design by: camp26.com" in the footer..
Must Agree To License
