
Hello, have troubles with Smooth Gallery...

Posted by Andrew - 2010/01/27 21:23

the website is www.fluffycamera.com
And the weird thing is that it works under IE 8.0
Under firefox and Opera it is all messed up.
If you can take a look maybe you can help how to fix that. Thanks!

i just updated the module with new option in module administrator , enable/disable mootools
after you re-download the module, try disable mootools via that option, save the setting and refresh the page

regards
