## Problems with Communittee

Posted by Der Meister - 2009/12/29 06:07

---

Hi there,

I'm working with the "Great" Communittee-template, but I have one problem.

Not all the features are working with Internet Explorer, who can help me to make my site working for all visitors?

Thanx,

Martin

Hi there, sorry for late reply

what feature do you mean?

i've visited your site, using IE and mozilla

but i dont see anything different between them except the automatic slide show module

if that's what you mean, then the problem is in the module not in the template

Hi Reza,

There are 2 problems with IE so far I now, the user can't change their profile when they are logged in, and they can't invite friends.

When you create a account you can see it.

Greetz,

Martin

i found the error too, that users can change their profile

but, until now we still cant fix it

sorry, but we'll keep trying

about the friend invitation, what's the error?

edit:

we can fix the error when the users want to change profile

open the index.php file of the template

delete line 126,

the script in that line conflict with community builder script

and i think the template dont need that script, so you can delete it

---

I delete the line, but it still doesn't work.

On the my site there is the now a line in the top that says;

```
jQuery.noConflict(); jQuery(document).ready(function($) { ; $('#camptabsBottom > ul').tabs(); });
```

When I restore line 126 the message stays their, how can I fix this??

=====

---

I restore the site with an backup but the problem stays. Line 126 stays empty

Can you tell me what line 126 was??

Thanx

i've seen your page and you deleted wrong line:)

i sent you email with attached index.php file

that index.php file is already without trouble line 126

you can replace old one with this file
