
Fisheye menu and Gtranslate clash

Posted by milind - 2010/02/03 02:12

Hi,
I am using Fisheye menu and was really happy with the menu, but then i tried the language conversion Gtranslate Module, and now the menu doesnt seem to work.

When i shift the Gtranslate to On fly(Jquery)mode the menu stops working.

Can u get me out of this...

Thanks

try changing the include jQuery option in the module administrator while you shift the GTranslate to jQuery mode
