
How can I place the menu in my content

Posted by Tangier - 2010/02/02 20:17

It seems that the only option I have is to place this sliding menu only in the menus. I would like to place this menu in an article. Is this possible?

Also, I tried placing this menu in top section, but was unable to see it.

Any suggestions?

nope, you can only put this module in a module position, not in an article

hmm, can i see your site? maybe i can found the problem if i see you site:)
